

## Technical Data

|                              |             |  |
|------------------------------|-------------|--|
| <b>Temperature</b>           | Range:      | -10 °C ... + 110 °C                                    |
|                              | Resolution: | 1 °C   |
|                              | Accuracy:   | ± 2 °C   |
|                              | Sensor:     | Glass Tube: Kerosene filled                            |
| <b>Flow</b>                  | Range:      | 1.6 ... 15 l/min                                       |
|                              | Resolution: | 0.05 l/min (1.6 – 4 l/min)<br>0.1 l/min (4 – 15 l/min) |
|                              | Accuracy:   | ± 0.3 l (up to 5 l/min) ± 5 % rdg (from 5 l/min)       |
|                              | Sensor:     | Backwater method with scale                            |
| <b>Unit</b>                  |             | l/min  |
| <b>Operation temperature</b> |             | 0 °C ... + 80 °C                                       |
| <b>Storage temperature</b>   |             | - 20 °C ... + 80 °C                                    |
| <b>Material</b>              |             | Plastic  |
| <b>Dimension (H x Ø)</b>     |             | 250 x 58 mm  |
| <b>Weight</b>                |             | 232 g  |
